EDUCATION

Astana IT University

Master's degree in Applied Data Analytics — Full Grant, GPA 3.6

Astana, Kazakhstan

2023 – 2025

Astana IT University

Bachelor's degree in Big Data Analysis — Full Grant, GPA 3.3

Astana, Kazakhstan

2020 – 2023

EXPERIENCE

AI/ML Engineer | LLMOps

Oct 2025 – Present

Global Optima Technologies (founded by an ex-Meta/Amazon senior ML engineer)

- Developed and maintained **LLM and speech services**, covering model adaptation, inference optimization, deployment, and monitoring
- Built **AI agents for business process automation**, integrating models with business data sources and applications

Junior Researcher

Mar 2025 – Present

AI Research Center at Astana IT University

- Developed **ML models** for EEG-based attention monitoring as part of [NeuroPro.kz](#)
- Authored publications on EEG-based cognitive states and ML methods in **Q1/Q2 international journals**

PROJECTS

Til-Qazyna ITutor | Docker Swarm, FastAPI, vLLM, Unsloth

[ITutor](#)

- Configured and deployed **LLM, ASR, and TTS APIs** on **3 servers with an A10 GPU each**, and set up **monitoring and load balancing systems** to serve **100 users**
- Optimized **ASR, LLM, and TTS model inference**, cutting **median latency** by **2x** for ASR, **3x** for LLM, and **4x** for TTS with **10 concurrent users**
- Fine-tuned an **LLM for the Kazakh language** using LoRA/QLoRA, improving model quality by **10%** on internal benchmarks

Samruk-Energy AI Platform | LangGraph, LangChain, Langfuse, Docling

- Developed a **ChatGPT-style web platform** integrating a multi-agent system, LLM serving, and external data sources, with authentication, evaluation, tracing, and monitoring
- Developed **three specialized agents** for different business processes:
 - * **Generative BI (text-to-SQL) agent** — enables managers to retrieve business metrics from corporate data through plain-language questions
 - * **Financial report generation agent** — automates Excel sales-forecast reports by subsidiary, year, and what-if scenario
 - * **Tender documentation analysis agent** — helps procurement specialists review technical specifications and tender documents by answering questions about their content

Master's Thesis | NumPy, Pandas, Matplotlib, PyTorch, PyGame

[GitHub](#)

- Published and won **III place (certificate)** at conference **«2025 IEEE AITU: Digital Generation»**
- Built an **evolutionary reinforcement learning** model for decentralized multi-agent systems, where agents controlled by a **Neural Network** evolved through **genetic algorithms** to optimize survival in a 2D grid environment

SKILLS

Programming: Python, SQL, Bash, HTML/CSS/JavaScript

Machine Learning & LLM: NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow, Hugging Face Transformers, Unsloth

Agentic AI & RAG: LangGraph, LangChain, Pydantic, MCP, OpenAI API, Anthropic API, Qdrant, Docling, ASR (faster-whisper), Orpheus TTS

Infra & Serving: FastAPI, vLLM, LiteLLM, Docker, Docker Swarm, Kubernetes (kubect1), Traefik

MLOps & Observability: MLflow, W&B, Prometheus, Grafana, Locust, Langfuse, LangSmith, LLM-as-judge

Developer Tools: Git, CI/CD (GitLab CI), Claude Code, Codex, context engineering, custom skills/rules

Languages: English (B2), Russian (Native)
